Squaw Valley Public Service District Customers Water Conservation Restrictions

The California Department of Water Resources approved an emergency regulation to require water conservation on May 5, 2015 pursuant to Sections 11346.1 and 11349.6 of the Government Code. In response to the mandatory drought regulation, the Squaw Valley Public Service District is continuing **Stage II Water Conservation Restrictions** and implementing **Emergency Irrigation Regulations**. The following restrictions are effective immediately:

- a. *Filling of swimming pools is prohibited if uncovered while not in use.*
- b. *Use of an ornamental fountain or similar water feature is prohibited, unless a water recycling system is used and public notice about the use of the system is prominently displayed.*
- c. *Outdoor irrigation is limited to **two** times per week, one hour per irrigation zone, per day. Hand watering is permitted at will. Irrigating outdoors during and within 48 hours following measureable rainfall is prohibited.*
- d. *Installation of new landscaping that requires irrigation is prohibited.*
- e. *Hardscapes. Water shall not be used to wash sidewalks, driveways, parking areas, tennis courts, decks, patios or other improved areas, unless required for driveway repair or maintenance, or for immediate fire, sanitation, or health hazards.*
- f. *Lodging Facilities. Lodging facilities must post water conservation literature in each room. Literature must be approved by the General Manager.*
- g. *Water use restrictions will remain in effect until the Board of Directors removes the restrictions.*
- h. *If a customer continues to violate the restrictions, a District representative may disconnect water service to the customer or reduce water service for household purposes only. Disconnected or reduced service will be restored after payment for reconnection.*
